

*Whatever the season the CASE
is a good investment*

Why? Because the CASE Tractor can be worked in all weathers, and cut costs to a minimum. Horse power is subjected to restrictions which do not affect the CASE. In a dry season the cost of horse teams is increased by higher price of feed and the shortage of water. In a wet season the soil is heavy and horse teams quickly tire.

With the CASE Tractor it is possible to do more work and better work. You can plow deeper—you can work the land better—you can do all the belt work on the farm. Efficiency makes for economy—lightens labour, saves operating costs, ensures better results.

Learn more about the CASE Tractor and CASE Service which is allied to it.

Spare parts are available at all branches.
